COMPANY OVERVIEW

NB Private Equity Partners Limited ("NBPE" or "the Company") is a closed-end investment company registered under the laws of Guernsey managed by NB Alternatives Advisers LLC (the "Investment Manager"), an indirect wholly owned subsidiary of Neuberger Berman Group LLC. NBPE invests in private equity funds managed by leading sponsors, including fund of funds managed by the Investment Manager, and makes direct private equity investments alongside leading sponsors ("co-investments"). NBPE's investment objective is to produce attractive returns on its capital from its private equity investments while managing investment risk through portfolio diversification across asset class, vintage year, geography, industry, and sponsor.

INVESTMENT MANAGER COMMENTARY

During April, NBPE funded a new special situations direct investment that was previously committed to in January 2011. The investment was in royalty backed notes that are collateralized by the sale of a testosterone gel used for hormone replacement therapy. The notes in which NBPE invested pay interest at a rate of LIBOR plus 16% (with a 1% LIBOR floor) and were issued at an original issue discount of 2.3%.

Including new investment activity, NBPE invested $11.1 million into private equity investments and received $5.7 million of distributions during April. As a result of this investment activity, the Company's private equity investment level increased to 100% of NAV at 30 April 2011. Approximately 87% of the contributions were invested in special situations funds and direct investments, 12% were invested in buyout funds, and 1% were invested in growth equity / venture funds. Nearly 70% of the distributions were from OCM Opportunities Fund VIIb, a 2008 vintage distressed debt fund.

As of 30 April 2011, the unaudited NAV per share was $10.64, which represents an increase of 0.9% compared to the unaudited NAV per share of $10.54 at 31 March 2011. During April, NBPE's portfolio value increased due to $3.6 million of net unrealized gains attributable to the receipt of Q1 2011 valuation information, $2.3 million of unrealized gains on credit-related fund investments, and $1.3 million of positive foreign exchange adjustments. These increases in value were offset by $0.1 million of unrealized losses on public equity securities. Share repurchases during the month were accretive to NAV per share by less than $0.01.

30 April 2011[1]

VALUATION METHODOLOGY

The Company carries its private equity investments on its books at fair value using the best information it has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions, if any, that affect marketability. The Company determines such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. The Company estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Company proactively re-values its investments before it has received updated information from the fund manager or lead sponsor if it becomes aware of material events that justify a change in valuation. If the Company concludes that it is probable an investment will be sold, the Company will adjust the carrying value to the amount the Company expects to realize from the sale, exclusive of transaction costs.

NBPE expects to issue its interim management report for the quarter ended 31 March 2011 in mid to late May. The interim management report will include unaudited financial information prepared in accordance with accounting principles generally accepted in the United States. NBPE is required to consider, and will consider, all known material information in preparing such interim report, including information that may become known subsequent to the issuance of this monthly report. Accordingly, amounts included in the interim management report may differ from this monthly report.

TRADING VOLUME AND SHARE REPURCHASE ACTIVITY

During the month of April, NBPE's aggregate trading volume on Euronext Amsterdam, the London Stock Exchange, and over-the-counter trading platforms was 1,108,510 shares, which represents an average daily trading volume of approximately 58,343 shares. The trading volume in April included approximately 690,341 shares traded over-the-counter and not reported on Euronext Amsterdam or the London Stock Exchange.

On 21 October 2010, NBPE announced the launch of a share buy-back programme (the "Programme") with the objective of implementing the Capital Return Policy previously announced by the Company. The Programme commenced with effect from 22 October 2010 and, subject to extension, will end on 31 August 2011. Under the terms of the Programme, NBPE has appointed The Royal Bank of Scotland N.V. (London Branch) ("RBS") to manage the Programme and has authorised RBS to effect on-market repurchases of class A ordinary shares on behalf of the Company on Euronext Amsterdam and/or the Specialist Fund Market of the London Stock Exchange. Shares bought back under the Programme will be cancelled. The operation of the Company's liquidity enhancement programme on Euronext Amsterdam, which is managed by The Royal Bank of Scotland N.V. pursuant to the liquidity enhancement contract dated 29 June 2010, has been suspended for the duration of the Programme.

During April, a total of 55,683 shares were repurchased under the Programme at an aggregate net purchase price of $447,805, or a weighted average price per share of approximately $8.04. There was one day in which transactions were conducted, and all of the shares bought back in April were cancelled. The share repurchases during the month were accretive to NBPE's NAV by less than $0.01 per share. As of 30 April 2011, there were 50,308,627 class A ordinary shares and 10,000 class B ordinary shares outstanding, with 3,150,408 class A ordinary shares held in treasury.

1. Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.

2. The diversification analysis by asset class and investment type is based on the fair value of underlying fund investments and direct / co-investments (including unfunded commitments on a total private equity exposure basis). The diversification analysis by year of investment, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. The year of investment is calculated at the portfolio company level and is defined as the date of capital deployment into a particular underlying investment. For primary investments and direct / co-investments, the vintage year is defined as the date of the first portfolio investment or the date of the direct / co-investment. For secondary investments, the vintage year is defined as the date of the secondary acquisition. The diversification by year of investment also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Determinations regarding asset class, investment type, geography and industry, as well as the allocation of unfunded commitments on a total private equity exposure basis, also represent the Investment Manager's estimates. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.
