A Cautious Investment Approach Reflecting the Uncertain Environment

Cash realisations slowed meaningfully after 2021 and the environment became highly uncertain. New investment activity slowed in 2022 and 2023

Commentary

- After the 2021 peak in realisations, exits slowed and uncertainty remained elevated, so we deliberately slowed investment pace
- Highly uncertain environment in 2022 – 2023 led to preserving cash
- Activity began to rebuild in 2024 and early 2025, with positive momentum until 'Liberation-day' announcements and subsequent pause of activity in PE market
- Market began to regain momentum by the end of 2025, but has again been destabilised by the conflict in the Middle East

Increasing Investment Level to Target Range

Neuberger's cautious investment approach meant NBPE's investment level declined and cash was built over time to repay the ZDPs and de-lever. In recent months, NBPE has increased its investment level to 109% and now targets 110% - 120% over the short to medium term (announced in June 2026)

Commentary

- Post-COVID de-leveraging and deliberately cautious investment pace
- Cash balances built up in advance to repay 2022 and 2024 ZDPs
- For the past few years NBPE operated at the lower end of NBPE's target investment level
- In November 2025, NBPE announced a new target investment level of 105%-110%, which has now been achieved.
- Investment level target of 110% - 120% over the short to medium term announced in June 2026
- Maintaining balance sheet strength remains a core focus; investment pacing will continue to be balanced with the overall level of realisations after taking into consideration other capital needs, such as dividends and share buybacks

Methodology

- As part of its ongoing portfolio monitoring process, Neuberger Private Markets analyzed the changes in valuation in Q4 2025 across a broad sample of private equity funds
- Changes in value are primarily based on reported capital account balances, supplemented by valuation guidance reported in GP presentations or provided during investor conference calls and one-on-one conversations
- For the sake of comparison, all changes in value are presented based on the percentage change in the U.S. Dollar ("USD") value of each investment (unless otherwise noted), which has an additional positive or negative impact on non-USD denominated investments given the volatility in certain FX rates
- The change in value for each quarter was adjusted for contributions and distributions that occurred during the quarter. For example, the Q4 2025 change in value was defined as either:
  - Investments with a GP reported capital account = (Q1 2026 NAV – Q1 2026 contributions + Q1 2026 distributions – Q4 2025 NAV) divided by (Q4 2025 NAV)
  - All other investments = Percentage change in unrealized portfolio value from Q4 2025 to Q1 2026, as estimated by the GP and adjusted for cash flows during the quarter
- The sample of private equity funds that was analyzed for this presentation includes 278 buyout funds managed by more than 100 different firms, representing 71% of the total relevant sample set of 392 buyout funds
- The buyout sample includes small-/mid-/large-cap buyout, value buyout (special situations) and growth buyout / growth equity strategies and excludes other strategies such as venture capital, infrastructure, energy, real estate, private debt, distressed debt, and opportunistic credit
- There was a wide variance in reported valuation changes depending on underlying portfolio composition and performance, as well as the valuation methodology utilized by each respective GP
- The performance shown is net of underlying GP management fees, carried interest and other expenses; however, it is gross of Neuberger management fees, carried interest and other expenses

Awards Disclosures

European Pensions Awards 2020, 2024 – Private Equity Manager of the Year: European Pensions, a leading publication for pension funds across Europe, launched these awards to give recognition to and honor the investment firms, consultancies and pension providers across Europe that have set the professional standards in order to best service European pension funds over the past year. Judging is undertaken by a group of judges with expertise across the European pension fund space. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Two judges analyze each category and the firm with the highest overall score wins that category. Votes are verified by the European Pensions' editorial team. Private Equity Wire 2021 – Best Fund of Funds Manager: Private Equity Wire, a specialist industry publication in Europe launched these awards to showcase excellence among industry participants. The publication partnered with Bloomberg to create a clearly defined methodology for selecting the award winners. Shortlists were created by Bloomberg from a fund manager universe including all funds managed by European-domiciled GPs with a minimum fund size of $100 million. Asset band grouping thresholds were based on individual fund sizes – not overall GP assets under management in a category. Funds were grouped according to category and vintages from 2013 to 2018 and ranked on the basis of their net IRR. GPs with more than one fund ranked among the top performers across multiple vintages within any category were shortlisted. Winners from each category were then decided by majority vote from the publication's readers. The award does not constitute an investment recommendation. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.

4. Valuation & Leverage: Past performance is no guarantee of future results. Fair value as of 31 December 2025 and subject to the following adjustments. 1) Excludes public companies, Marquee Brands and other investments not valued on a multiple of EBITDA. 2) Based on 48 private companies which are valued based on EV/EBITDA metrics. 3) The private companies included in the data represents 83% of direct equity investment fair value. 4) Companies not valued on multiples of EBITDA are excluded from valuation statistics. 5) Leverage statistics based on 48 private companies and exclude companies with net cash position; leverage data represents 83% of direct equity investment fair value. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 21 April 2026, based on reporting periods as of 31 December 2025 and 30 September 2025. EV and leverage data is wed by fair value. LTM EBITDA used by underlying GPs for valuation purposes may differ from EBITDA used to calculate growth rates due to pro forma or other adjustments and therefore the two data sets are not directly comparable.

5. Revenue & EBITDA Growth: Past performance is no guarantee of future results. The private companies included in the data represent approximately 83% of the total direct equity portfolio. Fair value as of 31 December 2025 and the data is subject to the following adjustments: 1) Excludes public companies, Marquee Brands and other investments not valued on multiples of EBITDA. 2) Analysis based on 52 private companies. 3) The following exclusions to the data were made: a) growth of one company (2% of value) was excluded from the data as the Manager believed the EBITDA growth rate was an outlier due to an extraordinary percentage change; if this company were included, EBITDA growth would have been materially higher b) one company (1% of direct equity fair value) was held less than one year and excluded from the growth rates c) two companies (3% of direct equity fair value) were excluded with non-comparable time frames of LTM revenue and/or LTM EBITDA data or insufficient information to calculate a growth rate. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and based on as reported by the lead private equity sponsor to the Manager as of 21 April 2026. Where necessary, estimates were used, which include pro forma adjusted EBITDA and other EBITDA adjustments, pro forma revenue adjustments, run-rate adjustments for acquisitions, and annualised quarterly operating metrics. LTM periods as of 31/12/25 and 30/9/25 and 31/12/24 and 30/9/24. LTM revenue and LTM EBITDA growth rates are wed by fair value. Growth rate data is based on 52 companies and subject to the aforementioned exclusions; underlying EBITDA reported by the GPs may include pro forma or other adjustments to LTM EBITDA in one or both periods and this reported EBITDA used to calculate growth rates may not be the same EBITDA for valuation purposes by underlying GPs. As a result, growth and valuation multiple data are not directly comparable.

6. Debt Covenant Statistics: Past performance is no guarantee of future results. Fair value as of 31 December 2025 and subject to the following adjustments. 1) Excludes public companies and Marquee Brands. 2) Analysis based on the top 30 private companies (excluding one industrials company) 3) The private companies included in the data represent approximately 79% of the total direct equity portfolio. Debt covenant analysis does not consider springing debt covenants which may apply to certain draw percentages of underlying company revolvers. Portfolio company debt details are based on the most recently available (unaudited) financial information (as of 31/12/25, 30/09/25 and 30/06/25) for each company as reported by the lead private equity sponsor to the Manager as of 21 April 2026.

7. Debt Maturity: Past performance is no guarantee of future results. Based on 31 December 2025 fair value and with investment fair values weighted by the company's debt to total capitalization ratio. Fair value is also subject to the following adjustments: 1) Excludes public companies and Marquee Brands. 2) Analysis based on the top 30 private companies (excluding one industrials company) 3) The private companies included in the data represent approximately 79% of the total direct equity portfolio. Portfolio company debt details are based on the most recently available (unaudited) financial information (as of 31/12/25, 30/09/25 and 30/06/25) for each company as reported by the lead private equity sponsor to the Manager as of 21 April 2026.
