NB Private Equity Partners Limited

NEUBERGER BERMAN

31 July 2019[1]

FUND OBJECTIVE

NB Private Equity Partners Limited ("NBPE" or the "Company") is a closed-end investment company registered under the laws of Guernsey managed by NB Alternatives Advisers LLC (the "Investment Manager"), an indirect wholly owned subsidiary of Neuberger Berman Group LLC.

Our investment objective is to produce attractive returns on capital by investing directly into Private Equity backed companies with a focus on capital efficient strategies while managing risk through portfolio diversification. NBPE pursues diversification across capital structure, asset class, vintage year, geography, industry and sponsor.

FUND MANAGER: NB ALTERNATIVES

- Over 30 years private equity investing experience
- Over $70 billion of commitments managed
- Stable team with over 200 private equity professionals with global presence
- LP in over 530 funds and 160+ limited partner advisory committee seats

MANAGER COMMENTARY

During July, NBPE funded approximately $30.0 million to two new direct equity investments in Advisor Group, a wealth management platform serving financial advisors, and AutoStore, a leading provider of automation technology for warehouse & distribution facilities. NBPE also completed an additional $6.0 million investment through the NB Specialty Finance Program. The main inward cashflows during the month were from interest and principal receipts from income investments. On 17 July 2019, NBPE declared the second 2019 dividend of $0.29 per Share, to be paid on 30 August 2019. On an annualised basis, the dividend payment represents a 3.2% yield on the 31 July 2019 NAV and 4.1% yield on the 31 July 2019 closing share price of £11.45. In aggregate during 2019 and inclusive of the upcoming dividend, NBPE will have returned $52.0 million to shareholders, consisting of $27.3 million of dividends and $24.7 million of share buybacks. Note that due to the timing of the receipt of information, 70% of the valuation information in this estimate remains as of 31st March 2019.

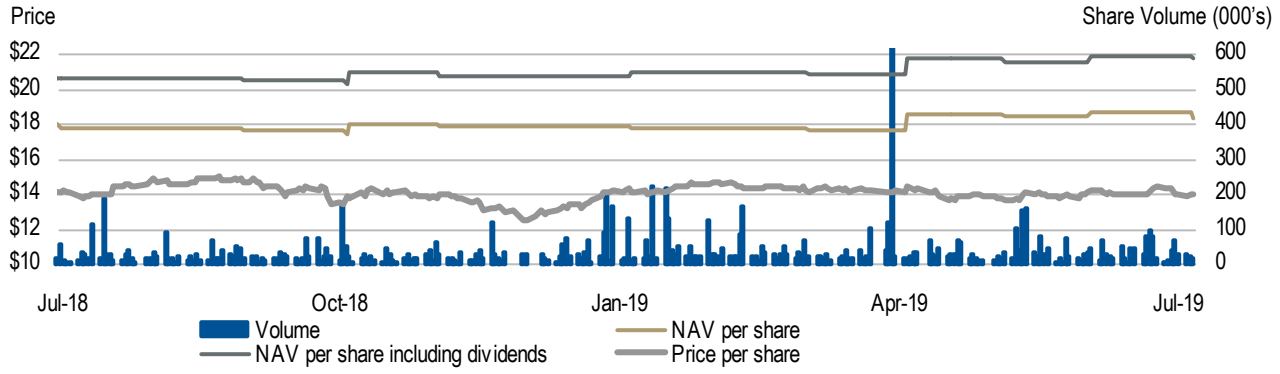
LTM ORDINARY SHARE PRICE AND NAV PERFORMANCE (TOTAL RETURN) AND TRADING VOLUME



VALUATION METHODOLOGY

It is expected that most of the investments in which the Company invests will meet the criteria set forth under FASB ASC 820 Fair Value Measurement ("ASC 820") permitting the use of the practical expedient to determine the fair value of the investments. ASC 820 provides that, in valuing alternative investments that do not have quoted market prices, but calculate NAV per share or equivalent, an investor may determine fair value by using the NAV reported to the investor by the underlying investment. To the extent ASC 820 is applicable to an investment, the Manager will value the Company's investment based primarily on the value reported to the Company by the investment or by the lead investor of a direct co-investment as of each quarter-end, as determined by the investments in accordance with its own valuation policies.

The Company generally uses the NAV reported by the investments as a primary input in its valuation; however, adjustments to the reported NAV may be made based on various factors, including, but not limited to, the attributes of the interest held, including the rights and obligations, any restrictions or illiquidity on such interest, any potential clawbacks by the investments and the fair value of the investments' investment portfolio or other assets and liabilities. The valuation process for investments categorized in Level 3 of the fair value hierarchy is completed on a quarterly basis and is designed to subject the valuation of Level 3 investments to an appropriate level of consistency, oversight and review. The Investment Manager has ultimate responsibility for the valuation process and the fair value of investments reported in the financial statements. The Investment Manager performs initial and ongoing investment monitoring and valuation assessments. In determining the fair value of investments, the Investment Manager reviews periodic investor reports and interim and annual audited financial statements received from the investments, reviews material quarter over quarter changes in valuation, and assess the impact of macro market factors on the performance of the investments.

Debt investments made on a primary basis are generally carried at cost plus accrued interest, if any. Investments made through the secondary market are generally marked based on market quotations, to the extent available, and the manager will take into account current pricing and liquidity of the security. For primary issuance debt investments, the Manager estimates the enterprise value of each portfolio company and compares such amount to the total amount of the company's debt as well as the level of debt senior to the Company's interest. Estimates of enterprise value are based on a specific measure (such as EBITDA, free cash flow, net income, book value or NAV) believed to be most relevant for the given company and compares this metric in relation to comparable company valuations (market trading and transactions) based on the same metric. In determining the enterprise value, the Manager will further consider the companies' acquisition price, credit metrics, historical and projected operational and performance, liquidity as well as industry trends, general economic conditions, scale and competitive advantages along with other factors deemed relevant. Valuation adjustments are made if estimated enterprise value does not support the value of the debt security the Company is invested in and securities senior to the Company's position. If the principal repayment of debt and any accrued interest is supported by the enterprise value analysis described above, the Manager will next consider current market conditions including pricing quotations for the same security and yields for similar investments.

For investments made on a secondary basis, to the extent market quotations for the security are available, the Manager will take into account current pricing and liquidity. Liquidity may be estimated by the spread between bid and offer prices and other available measures of market liquidity, including number and size of recent trades and liquidity scores. If the Manager believes market yields for similar investments have changed substantially since the pricing of the security, the Manager will perform a discounted cash flow analysis, based on the expected future cash flows of the debt securities and current market rates. The Manager will also consider the maturity of the investment, compliance with covenants and ability to pay cash interest when estimating the fair value of debt investments.

TRADING VOLUME

During the month of July, NBPE's aggregate trading volume on the London Stock Exchange and over-the-counter trading platforms was 1,017,230 Class A ordinary shares, which represents an average daily trading volume of approximately 44,227 Class A ordinary shares.

1. Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.
2. Other includes realised gains, investment income not classified as yield income, expenses, the ZDP liability and value changes to other assets, liabilities and shareholders equity.
3. NBPE declared a $0.29 per Share dividend on 17 July 2019, to be paid on 30 August 2019. On an annualised basis, this dividend payment represents a dividend yield of 3.2% based on the estimated 31 July 2019 NAV and 4.1% based on the London Stock Exchange closing price of £11.45 on 31 July 2019.
4. The diversification analysis by asset class and investment type is based on the fair value of underlying direct/co-investments and fund investments. The diversification analysis by year of investment, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. The year of investment is calculated at the portfolio company level and is defined as the date of capital deployment into a particular underlying investment. The diversification by year of investment also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.
5. Direct equity investment diversification includes all equity, including associated equity from income investments.
6. Based on 31 July 2019 GBP/USD FX of $1.224 and 30 June 2019 GBP/USD FX of $1.273.
