COMPANY OVERVIEW

NB Private Equity Partners Limited ("NBPE" or "the Company") is a closed-end investment company registered under the laws of Guernsey managed by NB Alternatives Advisers LLC (the "Investment Manager"), an indirect wholly owned subsidiary of Neuberger Berman Group LLC. NBPE invests in private equity funds managed by leading sponsors, including fund of funds managed by the Investment Manager, and makes direct private equity investments alongside leading sponsors ("co-investments"). NBPE's investment objective is to produce attractive returns on its capital from its private equity investments while managing investment risk through portfolio diversification across asset class, vintage year, geography, industry and sponsor.

INVESTMENT MANAGER COMMENTARY

During January, NBPE continued to close portions of the secondary purchase that was previously announced in October's monthly report. The secondary investments that closed in January represented $2.1 million of total private equity exposure.

In aggregate, NBPE invested $3.9 million in private equity investments and received $3.7 million of distributions during the month. As a result of this investment activity, the Company's private equity investment level remained at 112% of total net asset value at 31 January 2010. During January, approximately 75% of capital calls were invested in buyout funds, 15% were invested in distressed funds and 10% were invested in growth equity / venture funds. The distributions were largely related to the Company's investments in Wayzata Opportunities Fund II, First Reserve Fund XI and NB Crossroads Fund XVII. In addition, the Company also paid down $10.0 million of principal on its credit facility during January.

As of 31 January 2010, the unaudited net asset value per share was $9.12, which represents an increase of 0.8% compared to the unaudited net asset value per share of $9.04 at 31 December 2009. During January, NBPE's portfolio value increased due to $3.2 million of unrealized gains on credit-related fund investments. These gains in value were offset by $1.1 million of unrealized losses related to public equity securities and $0.5 million of unrealized losses related to negative foreign exchange adjustments. In addition, net unrealized gains of $3.4 million were attributable to the receipt of Q4 2009 valuation information and other adjustments for certain fund investments and private co-investments.

VALUATION METHODOLOGY

The Company carries its private equity investments on its books at fair value using the best information it has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions, if any, that affect marketability. The Company determines such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. The Company estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Company proactively re-values its investments before it has received updated information from the fund manager or lead sponsor if it becomes aware of material events that justify a change in valuation.

NBPE expects to issue a fiscal year 2009 annual report in mid-March that will include audited financial statements prepared in accordance with accounting principles generally accepted in the United States. NBPE is required to consider, and will consider, all known material information in preparing such financial statements, including information that may become known subsequent to the issuance of this monthly report. Accordingly, amounts included in the financial statements may differ from this monthly report.

LIQUIDITY ENHANCEMENT AGREEMENT

On 21 July 2008, the Company entered into a Liquidity Enhancement Agreement with ABN AMRO Bank N.V. London Branch ("ABN") in order to enhance and strengthen the liquidity in the trading of NBPE's Class A ordinary shares on Euronext Amsterdam by NYSE Euronext ("Euronext Amsterdam"). Under the terms of the Liquidity Enhancement Agreement the Company has granted to ABN sole discretion, in the name and for the account for the Company, to effect (subject to any required shareholder authority, all applicable legal and regulatory requirements and within certain agreed parameters) repurchases and sales out of treasury of the Company's Class A ordinary shares on Euronext Amsterdam. During January 2010, there were no shares repurchased under the Agreement. As of 31 January 2010, there were 51,059,592 Class A ordinary shares and 10,000 Class B ordinary shares outstanding, with 3,150,408 Class A ordinary shares held in treasury.

1. Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.

2. The diversification analysis by asset class and investment type is based on the net asset value of underlying fund investments and co-investments (including unfunded commitments on a total private equity exposure basis). The diversification analysis by vintage year, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. For primary investments and co-investments, the vintage year is defined as the date of the first portfolio investment or the date of the co-investment. For secondary investments, the vintage year is defined as the date of the secondary acquisition. The vintage year diversification also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Determinations regarding asset class, investment type, geography and industry, as well as the allocation of unfunded commitments on a total private equity exposure basis, also represent the Investment Manager's estimates. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.
